## Specifications

|                     |                                 |
|---------------------|---------------------------------|
| Model No.           | JL-241J                         |
| Rated Voltage       | Max 480Vac                      |
| Rated Frequency     | 50/60Hz                         |
| Rated Loading       | 15A                             |
| Signal Control      | 0-30 VDC, 250 mA Max            |
| IP                  | IP66 (Reachable after assembly) |
| Material Quality    | PBT                             |
| Ambient Temperature | -40°C ~ + 70°C                  |
